

# I Belong

## Encouraging Year 8 Students into Computer Science

Book a place now!

Monday 17th June 2024

9.15 am - 12.15 pm

The Castle School,  
Taunton,  
TA1 5AU.

Each school is requested to bring approximately ten year 8 students and include a higher percentage of girls.

Computer Science is the fastest-growing STEM subject, and yet, despite its popularity, girls are consistently outnumbered by boys.

In 2023, only 15% of all A Level Computer Science entries were from female students in England.

Contents of The Morning:

### Welcome

Keynote Speech - Julia Adamson, Managing Director of Education and Public Benefit at BCS, The Chartered Institute for IT.

Julia recently received an MBE for services to education. Julia is particularly interested in inclusion, and from her own experience understands how technology can impact positively on progress for all children.

### Digital Career Activities and Talks
